SEPTIC TANK AND ABSORPTION LINES MUST BE EXPOSED FOR INSPECTION WHEN:

- The home is 30 or more years old or;
- When a file search shows no record of the wastewater system.

The top end of septic tank must be uncovered and baffles exposed and the ends of the absorption field lines must be exposed for inspection.

A septic system evaluation provides lending institutions, homeowners or prospective buyers with information about the system and when requested a bacteriological report of the culinary water supply.

A wastewater system evaluation report is not:

- C a warranty or guarantee that the system will properly function for any period of time in the future.
- C an assurance that the soil is adequately treating effluent or that it will continue to do so in the future.
